5-YEAR WARRANTY

Ethernet-Air-Pack is a ready-to-use solution designed to replace any Ethernet cable between equipments (PC, IP video, printers ...), replace the network cable between the RJ45-wall outlet and the computer or even to establish a wireless bridge between two independent Ethernet networks (between two buildings, two PLC's networks ...).

The kit is built around two pre-configured WiFi units already associated, installation doesn't require any configuration.

Ethernet-Air-Pack relies on the WiFi 5 GHz standard (IEEE 802.11a) which is not widely used by WiFi equipments. This offers a good level of protection against perturbations generated by existing WiFi networks; you can install as much Ethernet Air-Pack as cables to be replaced.
