With its new ruggedized product family, Hirschmann™ delivers highly flexible, long-life switches, specially engineered for use in extremely harsh conditions.

Whether high temperatures, shock, vibration or EMC stress – the robust Fast/Gigabit Ethernet Rail RSR switches and the 19" MACH1000 switches are ideal for network solution applications in the power sector and

in transport automation. The wide and flexible RSR product spectrum ranges from 8 Port TX through to 10 Port Full Fiber and, in combination with MACH1000 modules, represents an unmatched complete solution.
