

## PACCS GN6210 Bluetooth® Headset

The GN6210 completely wireless headset brings the form and style of a mobile headset into the office by featuring a unique, behind-the-ear wearing style. Its contoured shape, complete with the patented MiniGel™ eartip, guarantees your comfort even with extended use. And the GN 6210's microphone ensures your caller's voice is clear. Freedom to move, multi-task and work smarter is all yours with the headset's 10m range and up to 8-hours of talk time.

But we didn't forget about your mobile lifestyle. The clever GN 6210 works wherever you work — in the office or on the move. With proprietary software, the headset is able to maintain a paired relationship with two phones – your office desk phone and your Bluetooth-enabled mobile phone. Using its ingenious GN Link™ technology, the GN 6210 identifies which phone is ringing and connects to it, giving you calling convenience like never ever before!
